

Sprint #3 Planning/Progress Update

Completed Task:

During Sprint 3, our team successfully completed the following tasks:

1. Setup Profile
2. Edit Profile
3. Create Job Post

Sprint #4 Tasks and Assignments

For Sprint 4, the following tasks have been identified and assigned:

1. Edit Job Post
 - Assignees: Jhon Lay Lopez, Jonnel Tocmo, Pearl Calderon
2. Delete Job Post
 - Assignees: Patrick Perez, Krystel Castillo

Sprint Retrospective – Sprint #3

What Went Well:

Our team made significant progress by successfully implementing two key features: edit profile info and create job post. The edit profile info feature now allows users to seamlessly update their personal details.

What Could Be Improved:

We faced several challenges with handling user sessions using PHP. Issues such as session timeouts, session persistence, and security concerns around session management were prevalent. These difficulties underscored the need for a more secure approach to session management.

What Needs to Be Done

Looking ahead to Sprint 4, our primary tasks include developing the ability to view applicants who applied for specific job posts and implementing a feature to hire applicants via email.

Summary:

With the milestones we achieved by completing our sprint 3 tasks, we mark this progress approximately 50% completion of overall project.
